From design to manufacture....

flexible [SolutionS] for you

Improving your medical or health-care facility

CUSTOMISED SOLUTIONS

We manufacture products specific to your needs. We can work with your individual design or develop a design that can be manufactured time and time again. Fully detailed drawings can be provided for your approval.

DESIGN SOLUTIONS

We can provide detailed drawings for your approval, in a format that you prefer. Commonly we will ask for your approval of the design before we commence work.

QUALITY ASSURANCE SYSTEMS

Engineering and quality systems on site mean reliability for you and your team. We use process control plans which guide you in how to use the product safely and reliably. And although you may not be using these now, they will help to reduce hazards in your business.

Hazard or Risk Management Solutions

We provide specialist solutions for improving risk management and reducing hazards inside your workplace.

We take health and safety very seriously and have been very proactive in providing health and safety solutions to issues in the workplace. Many of our products have already been evaluated by hospitals as providing improved ergonomics, easier materials handling and reduced risk.

We have standard engineering forms which we work on with our clients, to ascertain whether risks are being minimized in your workplace.

Quality Assurance

We have developed internal engineering systems which exceed ISO9001 requirements. We provide documentation including engineering drawings and photos, control plans and sign off sheets, throughout all stages of a project to ensure you are kept up to date with product timing. It is just one step in doing it better for you.

Making your health care facility safer and assisting to reduce risks

Medical
Healthcare
Hospital
Aged care
Disability

For more than 20 years, we have been providing specialized fabricating solutions for a range of industries including health and medical, industrial, marine, mining and resources, shop-fitting, building and defence and automotive sectors. We have more recently added further engineering capability including drawing and process control systems.

With capability to make one off prototypes or parts in volume, we can provide a cost competitive product or service for your team. Backed by years of experience and the desire to see that "it's all about the Solution", we would love the opportunity to improve your medical, aged care, hospital or health-care facility.
